***Drawings***

1. Examiner notes that the drawings were received on 24 November 2003. These drawings are accepted.

**REASONS FOR ALLOWANCE**

2. The following is an examiner's statement of reasons for allowance: Independent claims 1 and 22 recite the limitation, taking claim 1 as exemplary, "...said backing register file...in at least one mode, is always visible outside the processor and is directly accessible to instructions in the programs at any privilege level." Prior art searched and found have taught that the backing register file, which the Examiner equated with shadow register files that normally store data and status information related to the main register file and back-up register files that normally store over flow data from the main register file, physical relationship with the execution units and main register file claimed. The prior art has also taught bypassing circuits between the execution units and main register file. However, the prior art limits access to the backing register file. Prior art searched and found accesses the backing register through the main register file and, generally, does not allow direct access to the backing register file from program instructions at any privilege level. Most prior art had the backing register file hidden from the users, so there was no access to the backing register file by instructions at all. Prior art searched and found would simply transfer data to and from the main register file and instruction would access the main register file to retrieve data stored in the backing register file. Some prior art searched and found allowed instruction access to the backing register file but only select internal instructions, not program instructions of any privilege level, i.e. any program instruction not just internal instructions. Also, the backing register file of the searched and found prior art was not generally

visible outside the processor, but those that were did not teach that, in a certain mode, any program instruction could access the backing register file.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
